

PRODUCT INFORMATION

 Clone ID
 7E1

 Target
 CD45

Synonyms B220; CD45; CD45R; GP180; L-CA; LCA; LY5; T200

Host Species Rabbit

Description Anti-CD45 antibody(7E1), IgG1 Chimeric mAb

Delivery In Stock **Uniprot ID** P08575

IgG type Rabbit/Human Fc chimeric IgG1

Clonality Monoclonal
Reactivity Human
Applications IHC

Recommended Dilutions

IHC 1:100

Purification Purified from cell culture supernatant by affinity

chromatography

Formulation & -8%
Reconstitution lyop

Storage & Shipping

Background

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient temperature.

The protein encoded by this gene is a member of the protein tyrosine phosphatase (PTP) family. PTPs are known to be signaling molecules that regulate a variety of cellular processes including

cell growth; differentiation; mitosis; and oncogenic transformation. This PTP contains an

extracellular domain; a single transmembrane segment and two tandem intracytoplasmic catalytic domains; and thus is classified as a receptor type PTP. This PTP has been shown to be an essential regulator of T- and B-cell antigen receptor signaling. It functions through either

receptor signaling. It functions through either direct interaction with components of the antigen receptor complexes; or by activating various Src family kinases required for the antigen receptor signaling. This PTP also suppresses JAK kinases; and thus functions as a regulator of cytokine receptor signaling. Alternatively spliced transcripts variants of this gene; which encode
