

## **PRODUCT INFORMATION**

Clone ID 6A10 CDH3 **Target** 

**Synonyms** CDHP;HJMD;PCAD

**Host Species** Rabbit

Description Anti-CDH3 antibody(6A10); IgG1 Chimeric mAb

**Delivery** In Stock **Uniprot ID** P22223

IgG type Rabbit/Human Fc chimeric IgG1

Clonality Monoclonal Reactivity Human **Applications** Flow Cyt

Recommended **Dilutions** 

Flow Cyt 1/100

Purified from cell culture supernatant by affinity **Purification** 

chromatography

Formulation & Reconstitution

Background

Storage & Shipping

Lyophilized from sterile PBS, pH 7.4. Normally 5 % 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient temperature.

This gene encodes a classical cadherin of the cadherin superfamily. Alternative splicing results in multiple transcript variants, at least one of

which encodes a preproprotein that is

proteolytically processed to generate the mature glycoprotein. This calcium-dependent cell-cell adhesion protein is comprised of five extracellular cadherin repeats, a transmembrane region and a highly conserved cytoplasmic tail. This gene is located in a gene cluster in a region on the long arm of chromosome 16 that is involved in loss of heterozygosity events in breast and prostate cancer. In addition, aberrant expression of this protein is observed in cervical adenocarcinomas.

Mutations in this gene are associated with hypotrichosis with juvenile macular dystrophy and ectodermal dysplasia, ectrodactyly, and macular dystrophy syndrome (EEMS). [provided by

RefSeq, Nov 2015]

Usage Research use only

Conjugate Unconjugated

All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is prohibited. We are

**DIMA Disclaimer** 

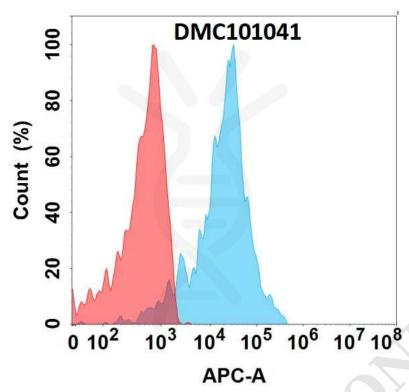

Figure 1. Flow cytometry analysis with Anti-CDH3 (6A10) mAb on Expi293 cells transfected with human CDH3 (Blue histogram) or Expi293 transfected with irrelevant protein (Red histogram).

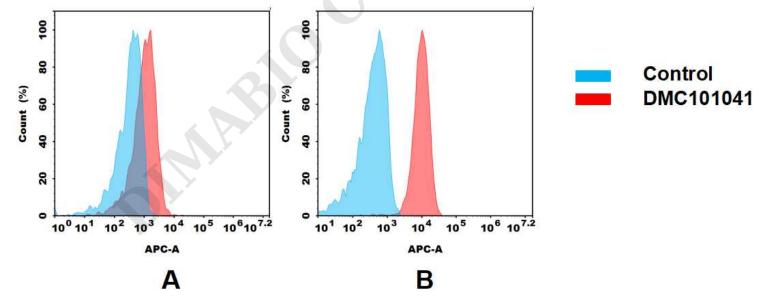

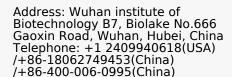

Figure 2. Flow cytometry analysis of antigen binding of anti-human CDH3 mAb(DMC101041). (A) DMC101041 does weakly bind to Jurkat cells that has a Low level expression of CDH3. (B) A clear peak shift of DMC101041 was seen compared to the control when incubated with CDH3-expressing A431 cells, indicating strong binding of DMC100280 to CDH3. Antibodies were incubated at 10  $\mu$ g/mL.
