Cat. No. DME101063

PRODUCT INFORMATION

Clone ID 12H7

G4S linker **Target** GGGGS **Synonyms Host Species** Rabbit

Description Anti-(G4S)4 antibody(12H7), Rabbit mAb

Uniprot ID N/A

IgG type Rabbit IgG Clonality Monoclonal

Reactivity N/A **ELISA Applications**

Recommended Dilutions

Storage & Shipping

Background

Delivery In Stock

Purified from cell culture supernatant by affinity **Purification**

chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

The poly-Glycine-Serine (G4S) linker is a type of flexible, unstructured synthetic peptide linker sequence often leveraged to connect antibody fragments (scFvs) and fusion proteins . The linker itself consists of a core pentapeptide sequence,

Gly-Gly-Gly-Ser, that is repeated and commonly found as either a 15-mer (G4S)3 or 20mer (G4S)4 within scFv-based CARs and scFv fragments. The linker sequence length plays a role in controlling scFv stability and the noncovalent association between the VH and VL
