

## **PRODUCT INFORMATION**

Clone ID DM216

Target GFAP

Synonyms ALXDRD

Host Species Rabbit

**Description** Anti-GFAP(68-377) antibody(DM216); Rabbit mAb

Delivery In Stock
Uniprot ID P14136
IgG type Rabbit IgG
Clonality Monoclonal
Reactivity Human
Applications ELISA

Recommended Dilutions

ELISA 1:5000-10000

Purification Purified from cell culture supernatant by affinity

chromatography

Formulation & Reconstitution

Storage & Shipping

**DIMA Disclaimer** 

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes one of the major intermediate filament proteins of mature astrocytes. It is used as a marker to distinguish astrocytes from other glial cells during development. Mutations in this gene cause Alexander disease: a rare disorder of

**Background** gene cause Alexander disease; a rare disorder of astrocytes in the central nervous system.

Alternative splicing results in multiple transcript variants encoding distinct isoforms. [provided by

RefSeq; Oct 2008]

**Usage** Research use only

**Conjugate** Unconjugated

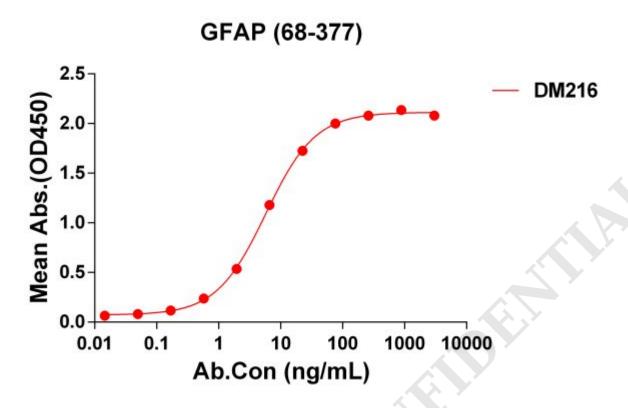

All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is prohibited. We are
