

## **PRODUCT INFORMATION**

Clone ID 1B7
Target IFNA2

**Synonyms** IFNA; IFNA2B; leIF A; IFN-alphaA; IFN-alpha-2

Host Species Rabbit

**Description** Anti-IFNA2 antibody(1B7), IgG1 Chimeric mAb

**Delivery** In Stock **Uniprot ID** P01563

**IgG type** Rabbit/Human Fc chimeric IgG1

Clonality Monoclonal
Reactivity Human
Applications Flow Cyt

Recommended Dilutions

Flow Cyt 1/100

**Purification** Purified from cell culture supernatant by affinity

chromatography

Formulation & Reconstitution

**Background** 

Storage & Shipping

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient temperature.

This gene is a member of the alpha interferon gene cluster on chromosome 9. The encoded cytokine is a member of the type I interferon family that is produced in response to viral infection as a key part of the innate immune response with potent antiviral, antiproliferative and immunomodulatory properties. This cytokine, like other type I interferons, binds a plasma membrane receptor made of IFNAR1 and IFNAR2

membrane receptor made of IFNAR1 and IFNAR2 that is ubiquitously expressed, and thus is able to act on virtually all body cells. The encoded

protein is effective in reducing the symptoms and duration of the common cold and in treating many types of cancer, including some

hematological malignancies and solid tumors. A deficiency of type I interferon in the blood is thought to be a hallmark of severe COVID-19 and

may provide a rationale for a combined therapeutic approach. [provided by RefSeq, Aug

2020]

Usage Research use only
Conjugate Unconjugated
