

## **PRODUCT INFORMATION**

Clone ID DM199 **Target NEFL** 

CMT1F; CMT2E; CMTDIG; NF-L; NF68; NFL; **Synonyms** 

PPP1R110

**Host Species** Rabbit

**Description** Anti-NEFL(89-400) antibody(DM199); Rabbit mAb

**Delivery** In Stock **Uniprot ID** P07196 Rabbit IgG IgG type Clonality Monoclonal Reactivity Human **Applications ELISA** 

Recommended

**Background** 

**DIMA Disclaimer** 

ELISA 1:5000-10000 **Dilutions** 

Purified from cell culture supernatant by affinity **Purification** 

chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & - 8% trehalose is added as protectants before Reconstitution

lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

témperature.

Neurofilaments are type IV intermediate filament heteropolymers composed of light; medium; and heavy chains. Neurofilaments comprise the axoskeleton and they functionally maintain the neuronal caliber. They may also play a role in intracellular transport to axons and dendrites.

This gene encodes the light chain neurofilament protein. Mutations in this gene cause Charcot-Marie-Tooth disease types 1F (CMT1F) and 2E (CMT2E); disorders of the peripheral nervous system that are characterized by distinct

neuropathies. A pseudogene has been identified

on chromosome Y. Research use only

**Usage** Conjugate Unconjugated

All DIMA recombinant antibodies are genuinely

generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is prohibited. We are
