Cat. No. DMC101357B

PRODUCT INFORMATION

Clone ID 15D6 ACVR2A **Target**

Synonyms ACVR2; ACTRII

Host Species Rabbit

Biotinylated Anti-ACVR2A antibody(15D6), IgG1 Description

Chimeric mAb

Delivery 2-3 weeks **Uniprot ID** P27037

Rabbit/Human Fc chimeric IgG1 IgG type

Clonality Monoclonal Reactivity Human **Applications** Flow Cyt

Recommended

Dilutions

Flow Cyt 1/100

Purified from cell culture supernatant by affinity **Purification**

chromatography Lyophilized from sterile PBS, pH 7.4. Normally 5 %

Formulation &

Background

Storage & Shipping

- 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Reconstitution for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient témperature.

This gene encodes a receptor that mediates the functions of activins, which are members of the transforming growth factor-beta (TGF-beta) superfamily involved in diverse biological processes. The encoded protein is a transmembrane serine-threonine kinase receptor

which mediates signaling by forming heterodimeric complexes with various

combinations of type I and type II receptors and ligands in a cell-specific manner. The encoded type II receptor is primarily involved in ligand-binding and includes an extracellular ligandbinding domain, a transmembrane domain and a cytoplasmic serine-threonine kinase domain. This

gene may be associated with susceptibility to preeclampsia, a pregnancy-related disease which can result in maternal and fetal morbidity and mortality. Alternative splicing results in multiple transcript variants of this gene. [provided by

RefSeq, Jun 2013]

Usage Research use only

Conjugate Biotinylated
