Cat. No. DMC100447B

PRODUCT INFORMATION

Clone ID **DMC447** CCR2 **Target**

Synonyms CC-CKR-2; MCP-1-R; CD192

Host Species Rabbit

Biotinylated Anti-CCR2 antibody(DMC447); IgG1 Description

Chimeric mAb

Delivery 2-3 weeks **Uniprot ID** P41597

Rabbit/Human Fc chimeric IgG1 IgG type

Clonality Monoclonal Reactivity Human **Applications** Flow Cyt

Recommended

Flow Cyt 1:100 **Dilutions**

Purified from cell culture supernatant by affinity **Purification**

chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

témperature.

The protein encoded by this gene is a receptor for monocyte chemoattractant protein-1; a chemokine which specifically mediates monocyte

chemotaxis. Monocyte chemoattractant protein-1

is involved in monocyte infiltration in inflammatory diseases such as rheumatoid

arthritis as well as in the inflammatory response against tumors. The encoded protein mediates **Background**

agonist-dependent calcium mobilization and inhibition of adenylyl cyclase. This protein can also be a coreceptor with CD4 for HIV-1 infection. This gene is located in the chemokine receptor

gene cluster region of chromosome 3.

Research use only Usage

Conjugate Biotinylated
