Cat. No. DME100034B

## **PRODUCT INFORMATION**

Clone ID **DM35** 

**Target** S protein RBD **Synonyms** SARS-CoV-2 RBD

**Host Species** Rabbit

Biotinylated Anti-SARS-CoV-2 RBD antibody(DM35); Rabbit mAb Description

**Delivery** 2-3 weeks **Uniprot ID** P0DTC2 Rabbit IgG IgG type Clonality Monoclonal Reactivity SARS-CoV-2

**Applications** ELISA; Flow Cyt

Recommended **Dilutions** 

Storage & Shipping

ELISA 1:5000-10000; Flow Cyt 1:100

Purified from cell culture supernatant by affinity **Purification** 

chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

SARS-CoV-2 (Severe Acute Respiratory Syndrome Coronavirus 2) also known as Covid19 (2019 Novel Coronavirus) is a virus that causes illnesses

ranging from the common cold to severe diseases. The spike protein is a type I transmembrane protein containing two subunits; S1 and S2. S1 mainly contains a receptor binding domain (RBD); which accounts for recognizing the cell surface receptor; ACE2. S2 contains basic **Background** 

elements needed for the membrane fusion. Recent publications indicate that S1-RBD domain can induce virus neutralizing-antibody and T cell

response.

**Usage** Research use only

Conjugate Biotinylated

> All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is prohibited. We are

**DIMA Disclaimer** actively scrutinizing all patent application to

ensure no IP infringement.
