

PRODUCT INFORMATION

TargetTIM3SynonymsHAVCR2; TIM3; TIMD3; FLJ14428; KIM3Host SpeciesRabbitDescriptionRibitinylated Anti-TIM3 antibody(DM83); Rabbit mAbDelivery2-3 weeksUniprot IDQ8TDQ0IgG typeRabbit IgGClonalityMonoclonalApplicationsELISA; Flow CytReactivityHumanApplicationsELISA; Flow Cyt 1:100PurificationsELISA 1:5000-10000; Flow Cyt 1:100PurificationsPurified from cell culture supernatant by affinity chromatography Lyophilized form sterile PBS, pH 7.4. Normally 5 % - s% trehalose is added as protectants before hyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Storage & ShippingStorage & ShippingThe protein encoded by this gene belongs to the immunoglobulin superfamily; and TIM family of motoes in the control of extracellular helminity chromatography claves is of their cytokine secretion patterns. Thi temperature.BackgroundReferense: Charloges secretion patterns. Thi cells are involved in the control of extracellular helminithic infaction in cell-motiper and delayed-type bypsitized form and bine reconstitution, in the environ of actoric and maliny of motoes in the control of extracellular helminithic infaction in cell-motiper and delayed-type hypositized form secretion patterns. Thi cells are involved in the control of extracellular helminithic infaction secretion patterns. Thi cells are involved in the control of extracellular helminithic infaction secretion of actoric and heleided into types areas: The protein secretion of actoric and heleided into types areas: The protein secretion patterns. Th	Clone ID	DM83
Host SpeciesRabbitDescriptionBiotinylated Anti-TIM3 antibody(DM83); Rabbit mAbDelivery2-3 weeksUniprot IDQ8TDQ0IgG typeRabbit IgGClonalityMonoclonalReactivityHumanApplicationsELISA; Flow CytRecommended DilutionsELISA 1:5000-10000; Flow Cyt 1:100PurificationPurified from cell culture supernatant by affinity chromatography Lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Storage & ShippingStorage & ShippingStorage & ShippingBackgroundBackground uided intervy treations; whereas; Th2 cells are involved in the cortrol of starte lubar of the protein sare the period in the protein sare shipped at ambient temperature. The protein encoded by this gene belongs to the immuglobulin superfamily; and TIM family of proteins, CD4-positive T helper lymphocytes can be divided into types 1 (Th2) and 2 (Th2) on the basis of their cytokine secretion patterns. Th1 cells are involved in cell-mediated immunity to intracellular pathogens and delayed-type hypersensitivity reactions; whereas; Th2 cells are involved in the control of extracellular helminthic infections and the promotion of atopic and allerigi diseases. This protein is a Th2 perific	Target	TIM3
DescriptionBiotinylated Anti-TIM3 antibody(DM83); Rabbit mAbDelivery2-3 weeksUniprot IDQ8TDQ0IgG typeRabbit IgGClonalityMonoclonalReactivityHumanApplicationsELISA; Flow CytRecommended DilutionsELISA 1:5000-10000; Flow Cyt 1:100PurificationPurified from cell culture supernatant by affinity chromatography Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilized from After reconstitution. Storage & ShippingStorage & Shippingafter reconstitution. at -80°C (Avoid repeated freezing and thawing). Lyophilized form. After reconstitution. The proteins are shipped at ambient temperature. The protein sare shipped at ambient temperature.Backgroundheat control of extracellular helminithic infections and the promotion of atopic and allergrid cliseases. This protein is a Th1-specific	Synonyms	HAVCR2; TIM3; TIMD3; FLJ14428; KIM3
DescriptionmAbmAbmAbDelivery2-3 weeksUniprot IDQ8TDQ0IgG typeRabbit IgGClonalityMonoclonalReactivityHumanApplicationsELISA; Flow CytRecommended DilutionsELISA 1:5000-10000; Flow Cyt 1:100PurificationPurified from cell culture supernatant by affinity chromatography Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilized form After reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution. Store at -80°C (Avoid repeated freezing and thawing). Lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature. The protein encoded by this gene belongs to the immunoglobulin superfamily; and TIM family of proteins. CD4-positive T helper lymphocytes can be divided into types 1 (Th1) and 2 (Th2) on the basis of their cytokine secretion patterns. Th1 cells are involved in cell-mediated immunity to intracellular pathogens and delayed-type hypersensitivity reactions; whereas; Th2 cells are involved in the control of extracellular helminthic infections and the promotion of atopic and allerigi cliseases. This protein is a Th1-specific	Host Species	Rabbit
