Cat. No. CEL100043

Warranty and

Disclaimer

Background

PRODUCT INFORMATION

Target CD46

Monoclonal Cell Line Derived from CHO-S Cells,
Engineered for Stable Expression of Human CD46

Using Lentiviral Technology

Host Cells CHO-S
Uniprot ID P15529
Applications FACS Data

Growth media DMEM+10% FBS+1% P.S+Gln+2 ug/mL

Puromycin

Package 5E6 Cells/mL

Suggested Control SKU: DME100145

1. Please inspect cells upon receipt and report any issues promptly. 2. We offer one-time replacements for issues reported within a week of receipt. 3. User-induced issues are not eligible for free replacements. 4. We do not accept liability

for damages resulting from cell use, storage, or loss. 5. Feedback received more than one month

after receipt will not be processed.

Storage & Shipping Cells are shipped using dry ice and require liquid nitrogen storage for long term preservation.

Synonyms CD46;AHUS2;MCP;MIC10;TLX;TRA2.10

The protein encoded by this gene is a type I membrane protein and is a regulatory part of the complement system. The encoded protein has cofactor activity for inactivation of complement components C3b and C4b by serum factor I; which protects the host cell from damage by complement. In addition; the encoded protein can act as a receptor for the Edmonston strain of measles virus; human herpesvirus-6; and type IV pili of pathogenic Neisseria. Finally; the protein encoded by this gene may be involved in the

encoded by this gene may be involved in the fusion of the spermatozoa with the oocyte during fertilization. Mutations at this locus have been associated with susceptibility to hemolytic uremic syndrome. Alternatively spliced transcript variants encoding different isoforms have been
