Background

PRODUCT INFORMATION

CTLA-4 **Target**

Monoclonal Cell Line Derived from CHO-S Cells, Engineered for Stable Expression of Human CTLA-4 Using Lentiviral Technology Description

Host Cells CHO-S P16410 **Uniprot ID Applications FACS Data**

DMEM+10% FBS+1% P.S+Gln+2 ug/mL **Growth media**

Puromycin 5E6 Cells/mL

Suggested Control SKU: BME100022

1. Please inspect cells upon receipt and report any issues promptly. 2. We offer one-time replacements for issues reported within a week of receipt. 3. User-induced issues are not eligible for free replacements. 4. We do not accept liability

for damages resulting from cell use, storage, or loss. 5. Feedback received more than one month

after receipt will not be processed.

Cells are shipped using dry ice and require liquid Storage & Shipping nitrogen storage for long term preservation.

Synonyms CTLA4;CD152

> This gene is a member of the immunoglobulin superfamily and encodes a protein which transmits an inhibitory signal to T cells. The protein contains a V domain, a transmembrane domain, and a cytoplasmic tail. Alternate

> transcriptional splice variants, encoding different isoforms, have been characterized. The

membrane-bound isoform functions as a homodimer interconnected by a disulfide bond, while the soluble isoform functions as a

monomer. Mutations in this gene have been associated with insulin-dependent diabetes mellitus, Graves disease, Hashimoto thyroiditis, celiac disease, systemic lupus erythematosus, thyroid-associated orbitopathy, and other
