Hu\_HVEM CHO-S Cell Line Cat. No. CEL100071

## **PRODUCT INFORMATION**

Target	HVEM
Description	Monoclonal Cell Line Derived from CHO-S Cells, Engineered for Stable Expression of Human HVEM Using Lentiviral Technology
Host Cells	CHO-S
Uniprot ID	Q92956
Applications	FACS Data
Growth media	DMEM+10% FBS+1% P.S+Gln+2 ug/mL Puromycin
Package	5E6 Cells/mL
Suggested Control	SKU: DME100131
Warranty and Disclaimer Storage & Shipping	<ol> <li>Please inspect cells upon receipt and report any issues promptly.</li> <li>We offer one-time replacements for issues reported within a week of receipt.</li> <li>User-induced issues are not eligible for free replacements.</li> <li>We do not accept liability for damages resulting from cell use, storage, or loss.</li> <li>Feedback received more than one month after receipt will not be processed.</li> <li>Cells are shipped using dry ice and require liquid</li> </ol>
	nitrogen storage for long term preservation.
Synonyms	ATAR; CD270; HVEA; HVEM; LIGHTR; TR2
Background	This gene encodes a member of the TNF (tumor necrosis factor) receptor superfamily. The encoded protein functions in signal transduction pathways that activate inflammatory and inhibitory T-cell immune response. It binds herpes simplex virus (HSV) viral envelope glycoprotein D (gD); mediating its entry into cells. Alternative splicing results in multiple transcript variants.
Usage	For research use only.
