Cat. No. FLP100166

## **PRODUCT INFORMATION**

**Target** 5HT2A

**Synonyms** 5-HT2A, HTR2

Human 5HT2A full length protein-synthetic **Description** 

nanodisc 6~8weeks

**Delivery Uniprot ID** P28223 **Expression Host HEK293** 

**Protein Families** GPCR, Transmembrane, Druggable Genome,

GPCRDB Class A Rhodopsin-like, GPCRDB **Protein Pathways** Other, Monoamine GPCRs, Metabolic and Obesity,

The human full length 5HT2A protein has a MW of **Molecular Weight** 

52.6kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

pH lower than 6.5 in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

This gene encodes one of the receptors for serotonin, a neurotransmitter with many roles. Mutations in this gene are associated with susceptibility to schizophrenia and obsessivecompulsive disorder, and are also associated with response to the antidepressant citalogram in patients with major depressive disorder (MDD). MDD patients who also have a mutation in intron

2 of this gene show a significantly reduced response to citalogram as this antidepressant downregulates expression of this gene. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by
