

PRODUCT INFORMATION

Target	AQP5
Synonyms	AQP-5; PPKB
Description	Human AQP5 full length protein-MNP
Delivery	In Stock
Uniprot ID	P55064
Expression Host	HEK293
Protein Families	Druggable Genome, Transmembrane
Protein Pathways	N/A
Molecular Weight	The human full length AQP5 protein has a MW of 28.3 kDa
Formulation & Reconstitution	Lyophilized from PBS. Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions.
Storage & Shipping	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
Background	Aquaporin 5 (AQP5) is a water channel protein. Aquaporins are a family of small integral membrane proteins related to the major intrinsic protein (MIP or AQP0). Aquaporin 5 plays a role in the generation of saliva, tears and pulmonary secretions. AQP0, AQP2, AQP5, and AQP6 are closely related and all map to 12q13.
Usage	Research use only
Conjugate	Unconjugated

ELISA assay to evaluate AQP5-MNP
0.5µg Human AQP5-MNP per well

Figure1. Elisa plates were pre-coated with 0.5µg/per well purified human AQP5 full length membrane nanoparticles. Serial diluted anti-Flag monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-Flag monoclonal antibody binding with AQP5 full length membrane nanoparticles is 7.009ng/ml.
