

PRODUCT INFORMATION

C-Flag Tag Tag

Target BRS3

Expression Host

Formulation &

Reconstitution

Background

Synonyms BB3, BB3R, BBR3

Human BRS3 full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks **Uniprot ID** P32247

Protein Families GPCR, Transmembrane, Druggable Genome,

GPCRDB Class A Rhodopsin-like, Peptide **Protein Pathways**

GPCRs, Cancer,

The human full length BRS3 protein has a MW of **Molecular Weight**

44.4kDa

HEK293

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene is a G protein-coupled membrane receptor that binds bombesinlike peptides. This binding results in activation of a phosphatidylinositol-calcium second messenger

system, with physiological effects including regulation of metabolic rate, glucose metabolism, and hypertension. [provided by RefSeq, Sep
