

PRODUCT INFORMATION

C-Flag&Strep Tag Tag

Target CA2D1

CACNA2, CACNL2A, CCHL2A, LINC01112, IncRNA-**Synonyms**

Human CA2D1-Strep full length protein-synthetic **Description**

nanodisc

Delivery 6~8weeks P54289 **Uniprot ID HFK293 Expression Host**

Protein Families Ion Channels: Other

Protein Pathways

Background

The human full length CA2D1-Strep protein has a **Molecular Weight**

MW of 124.6 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis

Store at -20°C to -80°C for 12 months in

lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

The preproprotein encoded by this gene is cleaved into multiple chains that comprise the alpha-2 and delta subunits of the voltagedependent calcium channel complex. Calcium channels mediate the influx of calcium ions into the cell upon membrane polarization. Mutations in this gene can cause cardiac deficiencies,

including Brugada syndrome and short QT syndrome. Alternate splicing results in multiple transcript variants, some of which may lack the delta subunit portion. [provided by RefSeq, Nov

2014]

Usage Research use only

Conjugate Unconjugated
