

PRODUCT INFORMATION

C-Flag Tag Tag

Target CD20

Synonyms B1; Bp35; CVID5; FMC7; LEU-16; MS4A1; S7

Human CD20 full length protein-synthetic **Description** nanodisc

Delivery In Stock **Uniprot ID** P11836 **Expression Host HEK293**

Storage & Shipping

Background

Protein Families Druggable Genome, Transmembrane

Protein Pathways Hematopoietic cell lineage

The human full length CD20 protein has a MW of **Molecular Weight**

33.1 kDa Lyophilized from nanodisc solubilization buffer (20

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

Formulation & Reconstitution for specific instructions. Do not use solvents with a pH below 6.5 or those containing high

concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

témperature.

A member of the membrane-spanning 4A gene family. Members of this nascent protein family are characterized by common structural features and similar intron/exon splice boundaries and display unique expression patterns among hematopoietic cells and nonlymphoid tissues. This gene encodes a B-lymphocyte surface molecule which plays a role in the development and

differentiation of B-cells into plasma cells. This family member is localized to 11q12, among a cluster of family members. Alternative splicing of this gene results in two transcript variants which

encode the same protein.

Research use only **Usage** Conjugate Unconjugated

ELISA assay to evaluate CD20-Nanodisc 0.2µg Human CD20-Nanodisc per well

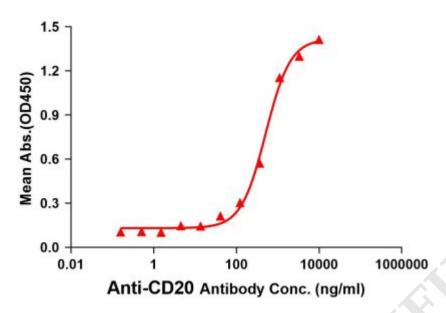

Figure 1. Elisa plates were added with Flag Tag CD20-Nanodisc ($0.2\mu g/per$ well) on an anti-Flag monoclonal antibody precoated ($0.5\mu g/per$ well) plate. Serial diluted anti-CD20 monoclonal antibody (BME100160) solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-CD20 monoclonal antibody binding with CD20-Nanodisc is 514.4ng/ml.
