

PRODUCT INFORMATION

C-Flag&Strep Tag Tag

CD39 Target

Storage & Shipping

Synonyms ATPDase; ENTPD1; NTPDase-1; SPG64

Human CD39-Strep full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks **Uniprot ID** P49961 **Expression Host HEK293**

Protein Families Transmembrane

Protein Pathways Purine metabolism, Pyrimidine metabolism

The human full length CD39-Strep protein has a **Molecular Weight**

MW of 58 kDa

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

Lyophilized from nanodisc solubilization buffer (20

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

témperature.

The protein is a plasma membrane protein that hydrolyzes extracellular ATP and ADP to AMP. Inhibition of this protein's activity may confer **Background**

anticancer benefits. Several transcript variants encoding different isoforms have been found for

this gene.

Usage Research use only Conjugate Unconjugated
