**Delivery Uniprot ID** 

**Background** 

Storage & Shipping

## **PRODUCT INFORMATION**

**Target** CLDN5

AWAL; BEC1; CPETRL1; TMDVCF; TMVCF **Synonyms** 

Human CLDN5 full length protein-synthetic **Description** 

nanodisc In Stock 000501

**HEK293** 

**Expression Host Protein Families** Transmembrane

Cell adhesion molecules (CAMs), Leukocyte **Protein Pathways** transendothelial migration, Tight junction

The human full length CLDN5 protein has a MW of **Molecular Weight** 

23.1 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before

Formulation & Reconstitution lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

pH lower than 6.5 in subsequent experiments. This protein is a member of the claudin family. Claudins are integral membrane proteins and components of tight junction strands. Tight

junction strands serve as a physical barrier to prevent solutes and water from passing freely through the paracellular space between epithelial or endothelial cell sheets. Mutations in this gene have been found in patients with velocardiofacial

syndrome.

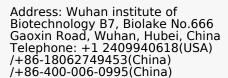

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C(Avoid repeated freezing and thawing).

> Email: info@dimabio.com Website: www.dimabio.com

Lyophilized proteins are shipped at ambient

temperature.

**Usage** Research use only

## ELISA assay to evaluate CLDN5-Nanodisc 0.2µg Human CLDN5-Nanodisc per well

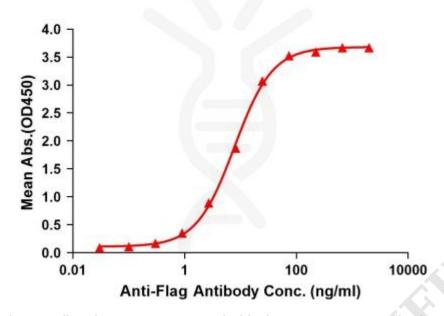

Figure 1. Elisa plates were pre-coated with Flag Tag CLDN5-Nanodisc ( $0.2\mu g/per$  well). Serial diluted anti-Flag monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-Flag monoclonal antibody binding with CLDN5-Nanodisc is  $7.814\mu g/ml$ .

Figure 2. Human CLDN5-Nanodisc, Flag Tag on SDS-PAGE
