

PRODUCT INFORMATION

Target CXCL14

KEC; KS1; BMAC; BRAK; NJAC; MIP2G; MIP-2g; **Synonyms**

SCYB14

Recombinant human CXCL14 Protein with C-**Description**

terminal human Fc tag

Delivery In Stock 095715 **Uniprot ID Expression Host** HFK293

Tag C-Human Fc tag

Molecular

Purity

Background

CXCL14(Ser35-Glu111) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of **Molecular Weight** 35.6 kDa after removal of the signal peptide.

The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & - 8% trehalose is added as protectants before Reconstitution lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

This antimicrobial gene belongs to the cytokine gene family which encode secreted proteins involved in immunoregulatory and inflammatory processes. The protein encoded by this gene is structurally related to the CXC (Cys-X-Cys) subfamily of cytokines. Members of this subfamily

are characterized by two cysteines separated by a single amino acid. This cytokine displays

chemotactic activity for monocytes but not for lymphocytes, dendritic cells, neutrophils or macrophages. It has been implicated that this cytokine is involved in the homeostasis of monocyte-derived macrophages rather than in inflammation. [provided by RefSeq, Sep 2014]
