

PRODUCT INFORMATION

Target DLK1

Delta1;DLK;DLK-1;FA1;pG2;Pref-1;PREF1;ZOG **Synonyms**

Recombinant human DLK1 protein with C-terminal **Description**

human Fc tag

Delivery Under development

Uniprot ID P80370 **Expression Host HEK293**

Tag C-Human Fc Tag

Molecular

Purity

DLK1 (Ala24-Gln303) hFc(Glu99-ALA330) Characterization

The protein has a predicted molecular mass of **Molecular Weight** 56.32 kDa after removal of the signal peptide.

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before Formulation &

lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a transmembrane protein that contains multiple epidermal growth factor repeats that functions as a regulator of cell growth. The encoded protein is involved in the differentiation of several cell types including adipocytes. This gene is located in a region of chromosome 14 frequently showing unparental disomy, and is

Background imprinted and expressed from the paternal allele.
A single nucleotide variant in this gene is

associated with child and adolescent obesity and shows polar overdominance, where heterozygotes carrying an active paternal allele express the

phenotype, while mutant homozygotes are normal. [provided by RefSeq, Nov 2015]

Research use only Usage

Conjugate Unconjugated
