

PRODUCT INFORMATION

C-Flag Tag Tag GPBAR1 **Target**

Synonyms BG37, GPCR19, GPR131, M-BAR, TGR5 Human GPBAR full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks **Uniprot ID** Q8TDU6 **Expression Host HEK293**

Protein Families Druggable Genome,

Protein Pathways N/A

Background

The human full length GPBAR protein has a MW of **Molecular Weight**

35.2kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis

Store at -20°C to -80°C for 12 months in

lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a member of the G protein-coupled receptor (GPCR) superfamily. This enzyme functions as a cell surface receptor for bile acids. Treatment of cells expressing this GPCR with bile acids induces the production of intracellular cAMP, activation of a MAP kinase signaling pathway, and internalization of the receptor. The receptor is implicated in the

suppression of macrophage functions and regulation of energy homeostasis by bile acids. Alternative splicing results in multiple transcript variants encoding the same protein. [provided by

RefSeq, Jul 2008]

Usage Research use only Conjugate Unconjugated
