

## **PRODUCT INFORMATION**

C-Flag Tag Tag

**Target** GRM5

**Synonyms** GPRC1E, MGLUR5, PPP1R86, mGlu5

Human GRM5 full length protein-synthetic **Description** 

nanodisc **Delivery** 6~8weeks

**Uniprot ID** P41594 **Expression Host HEK293** 

**Protein Families** GPCR, Transmembrane, Druggable Genome,

GPCRDB Class C Metabotropic glutamate **Protein Pathways** 

pheromone,

The human full length GRM5 protein has a MW of **Molecular Weight** 

132.5kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a member of the G-protein coupled receptor 3 protein family. The encoded protein is a metabatropic glutamate receptor, whose signaling activates a phosphatidylinositol-calcium second messenger system. This protein may be involved in the regulation of neural

network activity and synaptic plasticity. **Background** 

Glutamatergic neurotransmission is involved in most aspects of normal brain function and can be perturbed in many neuropathologic conditions. A pseudogene of this gene has been defined on chromosome 11. Alternative splicing results in multiple transcript variants. [provided by RefSeq,

May 2014]

Usage Research use only

Unconjugated Conjugate
