Cat. No. FLP100325

PRODUCT INFORMATION

Target GRM5

GPRC1E, MGLUR5, PPP1R86, mGlu5 **Synonyms**

Human GRM5 full length protein-synthetic **Description**

nanodisc 6~8weeks

Delivery Uniprot ID P41594 **Expression Host HEK293**

Protein Families GPCR, Transmembrane, Druggable Genome, GPCRDB Class C Metabotropic glutamate **Protein Pathways**

pheromone,

The human full length GRM5 protein has a MW of **Molecular Weight**

132.5kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

pH lower than 6.5 in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a member of the G-protein coupled receptor 3 protein family. The encoded protein is a metabatropic glutamate receptor, whose signaling activates a phosphatidylinositolcalcium second messenger system. This protein may be involved in the regulation of neural

network activity and synaptic plasticity. Glutamatergic neurotransmission is involved in **Background** most aspects of normal brain function and can be

perturbed in many neuropathologic conditions. A pseudogene of this gene has been defined on chromosome 11. Alternative splicing results in multiple transcript variants. [provided by RefSeq,
