

PRODUCT INFORMATION

IL17B **Target**

Synonyms IL-17B;Cytokine Zcyto7;IL-20

Recombinant human IL17B protein with C-**Description**

terminal human Fc tag

Delivery In Stock **Uniprot ID** Q9UHF5 **Expression Host HEK293**

Tag C-Human Fc Tag

Molecular

Background

IL17B(Gln21-Phe180) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of

44.3 kDa after removal of the signal peptide. The apparent molecular mass of IL17B-hFc is **Molecular Weight**

approximately 35-55 kDa due to glycosylation.

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue Purity

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & Reconstitution

- 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping

at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene is a T cell-derived cytokine that shares sequence similarity with IL17. This cytokine was reported to stimulate the release of TNF alpha (TNF) and IL1 beta (IL1B) from a monocytic cell line. Immunohistochemical

analysis of several nerve tissues indicated that this cytokine is primarily localized to neuronal cell bodies. Alternative splicing results in multiple splice variants. [provided by RefSeq, Dec 2015]
