

## **PRODUCT INFORMATION**

C-Flag&Strep Tag Tag

LPAR1 **Target** 

EDG2, Gpcr26, LPA1, Mrec1.3, VZG1, edg-2, **Synonyms** 

rec.1.3, vzg-1

Human LPAR1-Strep full length protein-synthetic Description

nanodisc

**Delivery** 6~8weeks **Uniprot ID** Q92633 **HEK293 Expression Host** 

Storage & Shipping

**Background** 

**Protein Families** GPCR, Transmembrane, Druggable Genome,

Small ligand GPCRs, Smooth muscle

contraction, Cancer, G-Protein Coupled Receptors **Protein Pathways** 

Signaling Pathway,

The human full length LPAR1-Strep protein has a **Molecular Weight** 

MW of 41.1 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% Formulation & - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Reconstitution for specific instructions. Do not use solvents with pH lower than 6.5 in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

The integral membrane protein encoded by this gene is a lysophosphatidic acid (LPA) receptor from a group known as EDG receptors. These receptors are members of the G protein-coupled receptor superfamily. Utilized by LPA for cell signaling, EDG receptors mediate diverse biologic functions, including proliferate contraction.

aggregation, smooth muscle contraction, inhibition of neuroblastoma cell differentiation, chemotaxis, and tumor cell invasion. Many transcript variants encoding a few different isoforms have been identified for this gene.
