lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

temperature.

This gene encodes a member of the G proteincoupled receptor family, as well as the EDG family of proteins. This protein functions as a cellular receptor for lysophosphatidic acid and mediates lysophosphatidic acid-evoked calcium mobilization. This recentor couples predominantly

mobilization. This receptor couples predominantly to G(q/11) alpha proteins. [provided by RefSeq,
