

PRODUCT INFORMATION

MAPT Target

TAU; MSTD; PPND; DDPAC; MAPTL; MTBT1; MTBT2; tau-40; FTDP-17; PPP1R103; Tau-PHF6 **Synonyms**

Recombinant human MAPT Protein with N-**Description**

terminal 6×His tag

Delivery In Stock **Uniprot ID** P10636 **Expression Host** HFK293 N-6×His tag Tag

Molecular

Storage & Shipping

Background

Purity

6×His tag MAPT(Ala2-Leu758) Characterization

The protein has a predicted molecular mass of

79.6 kDa after removal of the signal peptide. The apparent molecular mass of His-MAPT is **Molecular Weight**

approximately 100-250 kDa due to glycosylation.

The purity of the protein is greater than 85% as

determined by SDS-PAGE and Coomassie blue

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before Formulation & Reconstitution

lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in

lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

This gene encodes the microtubule-associated protein tau (MAPT) whose transcript undergoes complex, regulated alternative splicing, giving rise to several mRNA species. MAPT transcripts are differentially expressed in the nervous system, depending on stage of neuronal maturation and neuron type. MAPT gene

mutations have been associated with several neurodegenerative disorders such as Alzheimer's disease, Pick's disease, frontotemporal dementia, cortico-basal degeneration and progressive
