

PRODUCT INFORMATION

C-Flag&Strep Tag Tag

MC5R **Target Synonyms** MC2

Formulation & Reconstitution

Storage & Shipping

Background

Human MC5R-Strep full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks **Uniprot ID** P33032 **Expression Host HEK293**

GPCR, Transmembrane, Druggable Genome, **Protein Families**

Protein Pathways GPCRDB Class A Rhodopsin-like, Peptide GPCRs,

The human full length MC5R-Strep protein has a **Molecular Weight**

MW of 36.6 kDa Lyophilized from nanodisc solubilization buffer (20

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

témperature.

This gene encodes a member of the seven-pass transmembrane G protein-coupled melanocortin receptor protein family that stimulate cAMP signal transduction. The encoded protein is a receptor for melanocyte-stimulating hormone and

adrenocorticotropic hormone and is suggested to play a role in sebum generation. [provided by RefSeq, Jun 2010]

Usage Research use only

Conjugate Unconjugated
