

PRODUCT INFORMATION

Target	MCEMP1
Synonyms	Mast cell-expressed membrane protein 1
Description	Recombinant human MCEMP1 protein with N-terminal human Fc tag
Delivery	In Stock
Uniprot ID	Q8IX19
Expression Host	HEK293
Tag	N-Human Fc Tag
Molecular Characterization	hFc(Glu99-Ala330) MCEMP1(Lys107-Gln187)
Molecular Weight	The protein has a predicted molecular mass of 35.5 kDa after removal of the signal peptide. The apparent molecular mass of hFc-MCEMP1 is approximately 35-55 kDa due to glycosylation.
Purity	The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.
Formulation & Reconstitution	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.
Storage & Shipping	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
Background	This gene encodes a single-pass transmembrane protein. Based on its expression pattern, it is speculated to be involved in regulating mast cell differentiation or immune responses. [provided by RefSeq, Jul 2008]
Usage	Research use only
