

PRODUCT INFORMATION

Target MMP9

Synonyms GELB; CLG4B; MMP-9; MANDP2

Recombinant human MMP9(32-488) Protein with Description

C-terminal human Fc tag

Delivery In Stock **Uniprot ID** P14780 **Expression Host HEK293**

Tag C-Human Fc tag

Molecular

Purity

Background

Usage

MMP9(Pro32-Pro488) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of **Molecular Weight** 76.5 kDa after removal of the signal peptide.

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before

Formulation & lyophilization. Please see Certificate of Analysis Reconstitution for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

Proteins of the matrix metalloproteinase (MMP) family are involved in the breakdown of extracellular matrix in normal physiological processes, such as embryonic development, reproduction, and tissue remodeling, as well as in

disease processes, such as arthritis and metastasis. Most MMP's are secreted as inactive proproteins which are activated when cleaved by extracellular proteinases. The enzyme encoded by this gene degrades type IV and V collagens.

Studies in rhesus monkeys suggest that the enzyme is involved in IL-8-induced mobilization of hematopoietic progenitor cells from bone marrow, and murine studies suggest a role in tumor-
