

PRODUCT INFORMATION

C-Flag&Strep Tag Tag

Target OR1E1

HGM071; OR1E5; OR1E6; OR1E8P; OR1E9P; **Synonyms**

OR13-66; OR17-2; OR17-32; OST547

Human OR1E1-Strep full length protein-synthetic Description

nanodisc

Delivery 6~8weeks P30953 **Uniprot ID HFK293 Expression Host**

Protein Families Druggable Genome, Transmembrane

Protein Pathways Olfactory transduction

The human full length OR1E1-Strep protein has a **Molecular Weight**

MW of 35.3 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure with many neurotransmitter and

hormone receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to the olfactory receptor

> Email: info@dimabio.com Website: www.dimabio.com

genes and proteins for this organism is

independent of other organisms.

Usage Research use only Conjugate Unconjugated
