

PRODUCT INFORMATION

C-Flag Tag Tag OR2W1 **Target Synonyms** hs6M1-15

Human OR2W1 full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks **Uniprot ID Q9Y3N9 Expression Host HEK293**

Transmembrane, Druggable Genome, **Protein Families**

Protein Pathways GPCRDB Class A Rhodopsin-like,

The human full length OR2W1 protein has a MW **Molecular Weight**

of 36.1kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure with many neurotransmitter and hormone receptors and are responsible for the

recognition and G protein-mediated transduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to the olfactory receptor genes and proteins for this organism is

> Email: info@dimabio.com Website: www.dimabio.com

independent of other organisms. [provided by

RefSeq, Jul 2008]

Research use only **Usage** Conjugate Unconjugated

Background
