

## **PRODUCT INFORMATION**

C-Flag&Strep Tag Tag

**Target** OR3A3

OR17-137, OR17-16, OR17-201, OR3A6, OR3A7, **Synonyms** 

OR3A8P

Human OR3A3-Strep full length protein-synthetic Description

nanodisc 6~8weeks

**Delivery Uniprot ID** P47888 **HFK293 Expression Host** 

**Protein Families** Transmembrane, Druggable Genome,

**Protein Pathways** GPCRDB Class A Rhodopsin-like, GPCRDB Other,

The human full length OR3A3-Strep protein has a **Molecular Weight** 

MW of 35 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis

Store at -20°C to -80°C for 12 months in

lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure with many neurotransmitter and hormone receptors and are responsible for the

recognition and G protein-mediated transduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to the olfactory receptor

> Email: info@dimabio.com Website: www.dimabio.com

genes and proteins for this organism is

independent of other organisms. [provided by RefSeq, Jul 2008]

**Usage** Research use only Conjugate Unconjugated

**Background**
