Cat. No. FLP100823

PRODUCT INFORMATION

C-Flag Tag Tag P2RX1 **Target**

Synonyms P2X1

Human P2RX1 full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks **Uniprot ID** P51575 **Expression Host HEK293**

Ion Channels: ATP Receptors **Protein Families**

Protein Pathways

The human full length P2RX1 protein has a MW of **Molecular Weight**

45kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene belongs to the P2X family of G-protein-coupled receptors. These proteins can form homo-and heterotimers and function as ATP-gated ion channels and mediate rapid and selective permeability to cations. This protein is primarily localized to smooth muscle

where binds ATP and mediates synaptic

Background transmission between neurons and from neurons to smooth muscle and may being responsible for

sympathetic vasoconstriction in small arteries, arterioles and vas deferens. Mouse studies suggest that this receptor is essential for normal male reproductive function. This protein may also be involved in promoting apoptosis. [provided by
