

PRODUCT INFORMATION

Tag C-Flag Tag
Target P2RY6
Synonyms P2Y6

DescriptionHuman P2RY6 full length protein-synthetic

nanodisc

Delivery 6~8weeks

Uniprot ID Q15077

Expression Host HEK293

Protein Families GPCR,Transmembrane,Druggable Genome,

Protein Pathways GPCRDB Class A Rhodopsin-like, Nucleotide

GPCRs,Cancer,

Molecular Weight

The human full length P2RY6 protein has a MW of

36.4kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

Store at -20°C to -80°C for 12 months in

Storage & Shipping lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

témperature.

The product of this gene belongs to the family of P2 receptors, which is activated by extracellular nucleotides and subdivided into P2X ligand-gated

receptors. This family has several receptor subtypes with different pharmacological selectivity, which overlaps in some cases, for various adenosine and uridine nucleotides. This receptor, which is a G-protein coupled receptor.

receptor, which is a G-protein coupled receptor, is responsive to UDP, partially responsive to UTP and ADP, and not responsive to ATP. It is proposed that this receptor mediates inflammatory responses. Alternative splicing results in multiple transcript variants that encode different protein isoforms. [provided by RefSeq,

Mar 2013]

Usage Research use only
Conjugate Unconjugated
