

PRODUCT INFORMATION

Target pro-Beta

Beta-Nerve Growth Factor; Beta-NGF; NGF; NGFB;-**Synonyms**

NGF;pro-Beta NGF

Recombinant Human pro-Nerve Growth Factor is **Description**

produced by our E.coli expression system and the target gene encoding Glu19-Ala241 is expressed.

Delivery In Stock **Uniprot ID** P01138 **Expression Host** E.coli

Tag

Molecular

Characterization

Not available

Molecular Weight 25 KDa

Greater than 95% as determined by reducing SDS-**Purity**

PAGE.

Formulation &

Background

Conjugate

Lyophilized from a 0.2 μm filtered solution of 20mM Tris-HCl,500mM NaCl,5%Trehalose,5%Mannitol,0.01%tween80,1mM

Reconstitution

EDTA,pH8.0.

Unconjugated

Storage & Shipping

Store at -20 $^{\circ}$ C to -80 $^{\circ}$ C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid

repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature. The precursor form of the nerve growth factor (proNGF) like its mature form is characterized by the cystin knot motif consisting of three cystine bridges, whereas proneurotrophins and mature neurotrophins elicit opposite biological effects.

ProNGF functions preferentially via the complex of pan-neurotrophin receptor p75 (p75NTR) and

vps10p domain-containing receptor sortilin inducing neuronal apoptosis and contributing to age- and disease-related neurodegeneration.

Usage Research use only
