Delivery

Formulation &

Reconstitution

Background

PRODUCT INFORMATION

Target S1PR3

Synonyms EDG-3, EDG3, LPB3, S1P3

Human S1PR3 full length protein-synthetic **Description**

nanodisc 6~8weeks

Uniprot ID Q99500 **Expression Host HEK293**

Protein Families GPCR, Transmembrane, Druggable Genome,

S1P Signaling, Small ligand

GPCRs, Angiogenesis, G-Protein Coupled Receptors **Protein Pathways**

Signaling Pathway,

The human full length S1PR3 protein has a MW of **Molecular Weight**

42.3kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

for specific instructions. Do not use solvents with pH lower than 6.5 in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a member of the EDG family of receptors, which are G protein-coupled receptors. This protein has been identified as a functional receptor for sphingosine 1-phosphate and likely

contributes to the regulation of angiogenesis and vascular endothelial cell function. [provided by

RefSeq, Jul 2008]

Usage Research use only
