

PRODUCT INFORMATION

Target SCARB1
Tag C-Flag Tag

Synonyms CD36L1; CLA-1; CLA1; HDLQTL6; SR-BI; SRB1
Human SCARB1 full length protein-synthetic

Delivery In Stock
Uniprot ID Q8WTV0
Expression Host HEK293

Protein Families Druggable Genome, Transmembrane

Protein Pathways N/A

Formulation & Reconstitution

Background

Molecular Weight The human full length SCARB1 protein has a MW

of 60.9 kDa Lyophilized from nanodisc solubilization buffer (20

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with

for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

Storage & Shipping intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

The protein is a plasma membrane receptor for high density lipoprotein cholesterol (HDL). The encoded protein mediates cholesterol transfer to and from HDL. In addition, this protein is a receptor for high control of the protein is a processor for the protein is a plasma membrane receptor for high density lipoprotein choice is a processor for the protein is a plasma membrane receptor for high density lipoprotein choice is a processor for the protein is a plasma membrane receptor for high density lipoprotein choice is a processor for the protein is a plasma membrane receptor for high density lipoprotein is a processor for the protein is a plasma membrane receptor for the plasma membran

receptor for hepatitis C virus glycoprotein E2. Several transcript variants encoding different isoforms have been found for this gene.

Usage Research use only

Conjugate Unconjugated

ELISA assay to evaluate SCARB1-Nanodisc 0.2µg Human SCARB1-Nanodisc per well

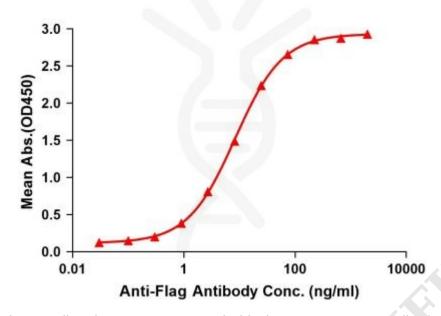

Figure 1. Elisa plates were pre-coated with Flag Tag SCARB1-Nanodisc ($0.2\mu g/per$ well). Serial diluted anti-Flag monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-Flag monoclonal antibody binding with SCARB1-Nanodisc is 8.388ng/ml.

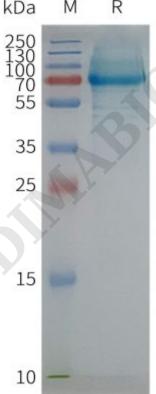

Figure 2. Human SCARB1-Nanodisc, Flag Tag on SDS-PAGE
