

PRODUCT INFORMATION

C-Flag&Strep Tag Tag

Target SCNNA

BESC2, ENaCa, ENaCalpha, LIDLS3, SCNEA, **Synonyms**

SCNN1

Human SCNNA-Strep full length protein-synthetic **Description**

nanodisc 6~8weeks

Delivery P37088 **Uniprot ID** HFK293 **Expression Host**

Protein Families Ion Channels: Other

Protein Pathways

Formulation & Reconstitution

The human full length SCNNA-Strep protein has a **Molecular Weight**

MW of 75.7 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

Nonvoltage-gated, amiloride-sensitive, sodium channels control fluid and electrolyte transport across epithelia in many organs. These channels are heteromeric complexes consisting of 3 subunits: alpha, beta, and gamma. This gene encodes the alpha subunit, and mutations in this

Background gene have been associated with

pseudohypoaldosteronism type 1 (PHA1), a rare salt wasting disease resulting from target organ unresponsiveness to mineralocorticoids.

Alternatively spliced transcript variants encoding different isoforms have been described for this

gene. [provided by RefSeq, Apr 2009]

Usage Research use only Conjugate Unconjugated
