

PRODUCT INFORMATION

C-Flag Tag Tag TAAR1 **Target**

Synonyms TA1, TAR1, TRAR1

Human TAAR1 full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks **Uniprot ID** Q96RJ0 **Expression Host HEK293**

Protein Families GPCR, Transmembrane, Druggable Genome,

Protein Pathways

Background

The human full length TAAR1 protein has a MW of **Molecular Weight**

39.1kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene is a G-protein coupled receptor activated by trace amines. The encoded protein responds little or not at all to dopamine, serotonin, epinephrine, or histamine, but responds well to beta-phenylethylamine, p-tyramine, octopamine, and tryptamine. While primarily functioning in neurologic systems, there is evidence that this gene is involved in blood cell

and immunologic functions as well. This gene is thought to be intronless. [provided by RefSeq, Nov 2015]
