Human TGFA Protein, hFc Tag Cat. No. PME101057

## **PRODUCT INFORMATION**

| Target                          | TGFA   |
|---------------------------------|--|
| Synonyms                        | TGF-alpha;ETGF;TGF type 1  |
| Description                     | Recombinant Human TGFA Protein with C-<br>terminal human Fc tag  |
| Delivery                        | In Stock   |
| Uniprot ID                      | P01135   |
| <b>Expression Host</b>          | HEK293   |
| Тад                             | C-Human Fc Tag   |
| Molecular<br>Characterization   | TGFA(Glu24-Gln98) hFc(Glu99-Ala330)  |
| Molecular Weight                | The protein has a predicted molecular mass of<br>34.1 kDa after removal of the signal peptide. The<br>apparent molecular mass of TGFA-hFc is<br>approximately 35-55 kDa due to glycosylation.  |
| Purity                          | The purity of the protein is greater than 95% as<br>determined by SDS-PAGE and Coomassie blue<br>staining.   |
| Formulation &<br>Reconstitution | Lyophilized from sterile PBS, pH 7.4. Normally 5 %<br>– 8% trehalose is added as protectants before<br>lyophilization. Please see Certificate of Analysis<br>for specific instructions of reconstitution.  |
| Storage & Shipping              | Store at -20°C to -80°C for 12 months in<br>lyophilized form. After reconstitution, if not<br>intended for use within a month, aliquot and store<br>at -80°C (Avoid repeated freezing and thawing).<br>Lyophilized proteins are shipped at ambient<br>temperature.   |
| Background                      | This gene encodes a growth factor that is a ligand<br>for the epidermal growth factor receptor, which<br>activates a signaling pathway for cell<br>proliferation, differentiation and development.<br>This protein may act as either a transmembrane-<br>bound ligand or a soluble ligand. This gene has<br>been associated with many types of cancers, and<br>it may also be involved in some cases of cleft<br>lip/palate. Alternatively spliced transcript variants<br>encoding different isoforms have been found for<br>this gene. [provided by RefSeq, Sep 2011] |
| Usage                           | Research use only  |
| Conjugate                       | Unconjugated   |
