

PRODUCT INFORMATION

C-Flag Tag Tag

TLR5 **Target**

Synonyms MELIOS; SLE1; SLEB1; TIL3

Human TLR5 full length protein-synthetic **Description**

nanodisc **Delivery** In Stock **Uniprot ID** 060602 **Expression Host HEK293**

Protein Families Druggable Genome, Transmembrane

Pathogenic Escherichia coli infection, Toll-like **Protein Pathways**

receptor signaling pathway

The human full length TLR5 protein has a MW of **Molecular Weight**

97.8 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis

lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Store at -20°C to -80°C for 12 months in

Storage & Shipping Lyophilized proteins are shipped at ambient

temperature.

Toll-like receptor (TLR) family plays a fundamental role in pathogen recognition and

activation of innate immune responses. These receptors recognize distinct pathogen-associated molecular patterns that are expressed on

infectious agents. The protein encoded by this gene recognizes bacterial flagellin, the principal component of bacterial flagella and a virulence factor. The activation of this receptor mobilizes the nuclear factor NF-kappaB, which in turn activates a host of inflammatory-related target

genes. Mutations in this gene have been associated with both resistance and susceptibility

to systemic lupus erythematosus, and susceptibility to Legionnaire disease.

Usage Research use only Conjugate Unconjugated

Background

ELISA assay to evaluate TLR5-Nanodisc 0.2µg Human TLR5-Nanodisc per well

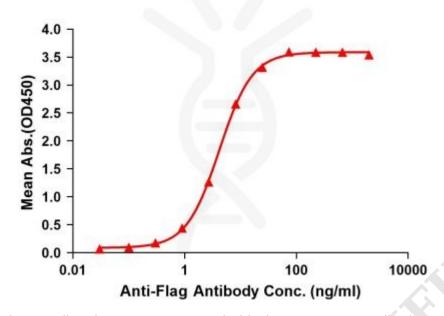

Figure 1. Elisa plates were pre-coated with Flag Tag TLR5-Nanodisc (0.2µg/per well). Serial diluted anti-Flag monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-Flag monoclonal antibody binding with TLR5-Nanodisc is 4.191ng/ml.

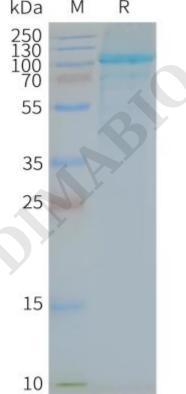

Figure 2. Human TLR5-Nanodisc, Flag Tag on SDS-PAGE
