

PRODUCT INFORMATION

C-Flag Tag Tag TRPC6 **Target**

Synonyms FSGS2, TRP6

Human TRPC6 full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks **Uniprot ID** Q9Y210 **Expression Host HEK293**

Protein Families Ion Channels: Transient receptor potential

Protein Pathways N/A

Background

The human full length TRPC6 protein has a MW of **Molecular Weight**

106.3kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene forms a receptor-activated calcium channel in the cell membrane. The channel is activated by diacylglycerol and is thought to be under the control of a phosphatidylinositol second messenger system. Activation of this channel occurs independently of protein kinase C and is

not triggered by low levels of intracellular calcium. Defects in this gene are a cause of focal
