

PRODUCT INFORMATION

Target TYRO3

Synonyms BYK; Dtk; Etk-2; Rek; RSE; Sky; Tif

Recombinant human TYRO3 protein with C-**Description**

terminal human Fc tag

Delivery Under development

Uniprot ID Q06418 **Expression Host HEK293**

Tag C-Human Fc Tag

Molecular

Purity

TYRO3 (Ala41-Trp429) hFc (Glu99-Ala330) Characterization

The protein has a predicted molecular mass of **Molecular Weight** 68.31 kDa after removal of the signal peptide.

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before Formulation &

lyophilization. Please see Certificate of Analysis Reconstitution for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

The gene is part of a 3-member transmembrane receptor kinase receptor family with a processed pseudogene distal on chromosome 15. The encoded protein is activated by the products of the growth arrest-specific gene 6 and protein S

Background genes and is involved in controlling cell survival and proliferation, spermatogenesis,

immunoregulation and phagocytosis. The encoded protein has also been identified as a cell

entry factor for Ebola and Marburg viruses. [provided by RefSeq, May 2010]

Usage Research use only

Conjugate Unconjugated
