

PRODUCT INFORMATION

Target GITR

Synonyms AITR; Gitr

Recombinant mouse GITR protein with C-terminal **Description**

human Fc tag

Delivery In Stock **Uniprot ID** 035714 **Expression Host HEK293**

Tag C-Human Fc Tag

Molecular

Storage & Shipping

Background

Mouse GITR(Ser22-His153) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of 40.3 kDa after removal of the signal peptide. The

Molecular Weight apparent molecular mass of mGITR-hFc is

approximately 35-55 kDa due to glycosylation. The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

Purity staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store

at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

Receptor for TNFSF18. Seems to be involved in interactions between activated T-lymphocytes and endothelial cells and in the regulation of Tcell receptor-mediated cell death. Mediated NF-kappa-B activation via the TRAF2/NIK pathway

(By similarity).[UniProtKB/Swiss-Prot Function]
