

PRODUCT INFORMATION

Clone ID **DM66** 4-1BB **Target**

TNFRSF9; 4-1BB; CD137; CDw137; ILA **Synonyms**

Host Species Rabbit

PE-conjugated Anti-4-1BB antibody(DM66); Rabbit Description

mAb

Delivery Under Development

Uniprot ID Q07011 Rabbit IgG IgG type Clonality Monoclonal Reactivity Human Flow Cyt **Applications**

Recommended Flow Cyt 1:100 **Dilutions**

Formulation &

Background

DIMA Disclaimer

Purified from cell culture supernatant by affinity **Purification**

chromatography

Liquid PBS with 0.05% Proclin300, 1% BSA Reconstitution

Storage & Shipping Store at 2°C-8°C for 6 months The protein encoded by this gene is a member of

the TNF-receptor superfamily. This receptor contributes to the clonal expansion; survival; and development of T cells. It can also induce proliferation in peripheral monocytes; enhance T cell apoptosis induced by TCR:CD3 triggered activation; and regulate CD28 co-stimulation to

promote Th1 cell responses. The expression of this receptor is induced by lymphocyte activation. TRAF adaptor proteins have been shown to bind to this receptor and transduce the signals leading

to activation of NF-kappaB.

Usage Research use only Conjugate PE-conjugated

> All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is prohibited. We are actively scrutinizing all patent application to ensure no IP infringement.
