

PRODUCT INFORMATION

| | |
|---|---|
| Clone ID | 407C3 |
| Target | CLDN6 |
| Synonyms | Claudin 6;Claudin-6;Skullin |
| Host Species | Rabbit |
| Description | PE-conjugated Anti-CLDN6 antibody(407C3), IgG1 Chimeric mAb |
| Delivery | 3-4 weeks |
| Uniprot ID | P56747 |
| IgG type | Rabbit/Human Fc chimeric IgG1 |
| Clonality | Monoclonal |
| Reactivity | Human |
| Applications | Flow Cyt |
| Recommended Dilutions | Flow Cyt 1:100 |
| Purification | Purified from cell culture supernatant by affinity chromatography |
| Formulation & Reconstitution | N/A |
| Storage & Shipping | Store at 2°C-8°C for 6 months |
| Background | <p>Tight junctions represent one mode of cell-to-cell adhesion in epithelial or endothelial cell sheets, forming continuous seals around cells and serving as a physical barrier to prevent solutes and water from passing freely through the paracellular space. These junctions are comprised of sets of continuous networking strands in the outwardly facing cytoplasmic leaflet, with complementary grooves in the inwardly facing extracytoplasmic leaflet. This gene encodes a component of tight junction strands, which is a member of the claudin family. The protein is an integral membrane protein and is one of the entry cofactors for hepatitis C virus. The gene methylation may be involved in esophageal tumorigenesis. This gene is adjacent to another family member CLDN9 on chromosome 16.[provided by RefSeq, Aug 2010]</p> |
| Usage | Research use only |
