

## **PRODUCT INFORMATION**

Clone ID DM177 PD-1 **Target** 

**Synonyms** PDCD1; PD1; CD279; SLEB2

**Host Species** Rabbit

PE-conjugated Anti-PD-1 antibody(DM177); Rabbit Description

mAb

**Delivery Under Development** 

**Uniprot ID** Q15116 **IgG** type Rabbit IgG Clonality Monoclonal Reactivity Human **Applications** Flow Cyt

Recommended Flow Cyt 1:100 **Dilutions** 

Formulation &

**DIMA Disclaimer** 

Purified from cell culture supernatant by affinity **Purification** 

chromatography

Liquid PBS with 0.05% Proclin300, 1% BSA Reconstitution

Storage & Shipping Store at 2°C-8°C for 6 months

This protein is expressed in pro-B-cells and is thought to play a role in their differentiation. In mice; expression of this gene is induced in the thymus when anti-CD3 antibodies are injected and large numbers of thymocytes undergo apoptosis. Mice deficient for this gene bred on a

**Background** BALB:c background developed dilated

cardiomyopathy and died from congestive heart failure. These studies suggest that this gene product may also be important in T cell function and contribute to the prevention of autoimmune

diseases.

**Usage** Research use only

PE-conjugated Conjugate

> All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is prohibited. We are actively scrutinizing all patent application to ensure no IP infringement.
